To South Carolina Electric & Gas Company my concern is that I had recieved a letter from your office that, the Electricity is increasing. But it will be a meeting several Location, I'm writing this letter to in voices my opinion about the rate going up. As we the people of America everything going up, but we are not getting any more money on our pay check. The older people I couldn't see they will be paying a high electric bills of \$ 800.00 a month. Some people can't pay they electric bill right now, by they asking for some kind of Government system. I hope you will take some kind of conscious ,for the ones did business with your company in their Life time, that mean everyone in each County, please don't raise the electricity no more than it is now, it's already expense we have a hard time paying electric bill
